

Pear Deck's Third Party Service Partners

(as of June 23, 2021)

Our Partners

We continuously strive to make our products the best they can possibly be, but we cannot build everything on our own. Like other education software companies, we rely on tools built by third party companies to deliver better solutions to our customers. These third party partners offer essential services and functions to our customers, and each company we work with operates under an agreement with Pear Deck to protect information shared with them.

Below is a list of our trusted and essential third party partners that collect **Personal Student Information** (as defined in our [Privacy Policy](#)) that support our Product.

As our company and products continue to evolve and grow, we may need to update this list of third party service partners from time to time. Additionally, please feel free to contact us at peardecklegal@goguardian.com if you have any questions.

Service Partner	Purpose or Description of Use	Service Partner's Privacy Policy
Google Cloud Platform	Data storage - for archived sessions (not for newer sessions)	Google Cloud Platform Terms of Service & Security
Firebase.io	Store information (e.g., real time student responses)	Firebase.io Privacy Statement
mongodb.com	Stores information	MongoDB Privacy Policy
Google	Use the APIs to authenticate into our App as well as connect to presentations.	Google Privacy Policy
Microsoft	Use the API to authenticate into our App as well as connect to presentations.	Microsoft Privacy Statement

The Service Partner's standard Privacy Policy and/or privacy-related terms are linked above, but Pear Deck may enter into additional contractual terms, such as additional privacy and security terms, with these Service Providers.
